

Rahat Sultan

Rawalpindi, Pakistan | rahatsultan654@gmail.com | +92 333 5326134

SUMMARY

Final-year Computer Science student specializing in Artificial Intelligence and Machine Learning, with a solid foundation in software engineering, database management, and network security. Hands-on experience building CNN-based image classification models and developing front-end web applications. Seeking an entry-level role to apply strong technical and analytical skills in a dynamic IT environment.

SKILLS

Programming & Databases: Python, C++, SQL, MySQL
Web Development: HTML, CSS, JavaScript, React
Machine Learning / AI: Convolutional Neural Networks (CNN), Image Classification, Model Training & Evaluation
Core CS Foundations: Software Engineering, Database Management, Network Security
Tools: Canva, Sejda

WORK EXPERIENCE

Backend Development Intern Feb 2026 – Mar 2026
DRAP (Drug Regulatory Authority of Pakistan), Islamabad, Pakistan

- Completed a one-month internship focused on backend development at Pakistan's national drug regulatory authority
- Gained hands-on exposure to backend development workflows and practices in a public-sector IT environment

IT Intern – Systems Department Aug 2024 – Sep 2024
OGDCL (Oil & Gas Development Company Limited), Islamabad, Pakistan

- Completed a one-month internship focused on networking within the Systems Department
- Gained exposure to enterprise-level network infrastructure and operations

PROJECTS

Image Classification with CNNs May 2024 – Jul 2024

- Selected and preprocessed image datasets (CIFAR-10, MNIST, and custom datasets) for classification tasks
- Designed and trained Convolutional Neural Network (CNN) architectures, tuning hyperparameters and regularization techniques to improve accuracy
- Evaluated model performance on test sets and iterated on architecture to optimize results

Hierarchical Computer Network Design Oct 2023 – Jan 2024

- Designed a hierarchical network combining wired and wireless connectivity, assigning a unique IP address to each device
- Built a scalable bus topology to support future growth while optimizing traffic flow and reducing congestion

Movie Theater Database Management System Jan 2023 – Mar 2023

- Designed and implemented a SQL/MySQL database to manage movie schedules, ticket sales, and customer records
- Wrote database queries and enforced data integrity, streamlining the ticket booking process

Personal Web Development Projects Jun 2023 – Jul 2023

- Self-taught front-end web development fundamentals; designed and built multiple websites using HTML, CSS, and JavaScript

EDUCATION

Bachelor of Science, Computer Science Mar 2022 – Present
BIMS, affiliated with PMAS-AAUR, Rawalpindi

Intermediate, Computer Science 2020 – 2021
Bahria College Naval Anchorage, Islamabad

Matriculation, Computer Science 2018 – 2019
Fazaia Inter College, Jinnah Camp, Nur Khan, Rawalpindi

CERTIFICATIONS

JavaScript Algorithms and Data Structures Certification — freeCodeCamp In Progress
